

Plantronics Voyager™ 855 Rocks the Headset World

New Plantronics Voyager™ 855 is First Two-in-One Stereo Bluetooth Headset With Exclusive AudioIQ Technology for Crystal Clear Wireless Sound

Plantronics, Inc. today launches the new Voyager™ 855, the industry's first mono-to-stereo convertible Bluetooth® headset with AudioIQ® DSP noise reduction technology for MP3 mobile phones.

The new Plantronics Voyager™ 855 headset offers a convertible design with immersive sound experience for calls and listening to music on Bluetooth® enabled mobile phones with stereo A2DP. The lightest stereo headset available to date, the new Voyager™ 855 includes intelligent features that offer unparalleled audio clarity.

Tailored Wear for Mono or Stereo Sound

Customisable for either mono or stereo use, the Plantronics Voyager™ 855 features a detachable stereo cable so consumers can tailor the wearing style to their communication and entertainment preferences. With specially designed, form-fitting ear buds, the Voyager™ 855 fits snugly and securely to seal out unwanted background distractions.

The Voyager™ 855's sound-isolating ear buds and convertible cable offer crystal clear wireless stereo sound when listening to digital music, as well as complete binaural immersion for conversations. When attached, the stereo cable also enables wireless AVRCP remote control capabilities. Plantronics' stereo multipoint technology alerts users to incoming calls and allows easy switching between conversations and music.

Drop the second ear bud or detach the cable and the headset serves as a high-quality mono Bluetooth® device.

"The Voyager™ 855's stereo cable and fitted ear buds essentially replace that

'finger in the ear' we all use to help block out distracting background commotion," said Eric Extier from Plantronics, Inc.

"Consumers are in and out of noisy, busy surroundings while trying to conduct calls, listen to voicemail or enjoy music on their phones," added Extier.

"Whether you're using your phone from a cafe or the back of a cab, you want to hear your audio as well as be heard clearly and intelligibly. You need to hear and be heard clearly, regardless of where you need to take a call – in an airport, in a taxi or in the street; we have an adaptable solution for this need."

Slide-to-Talk, Boom-Extended Microphone

The Plantronics™ Voyager 855 Bluetooth headset features a sleek slide-to-talk boom to provide convenient call control and improved audio performance. Sliding the boom open instantly connects the caller. The extending boom also houses a voice tube to position the microphone closer to the mouth for directional voice reception, ensuring maximum voice clarity and intelligibility. When the boom slides back, the call ends and/or the user's music selection conveniently resumes play.

Plantronics AudioIQ® - Noise Reduction and Two-Way Call Clarity

The Voyager™ 855 features Plantronics' award-winning AudioIQ® technology - an exclusive, adaptive digital signal processing (DSP) technology that automatically reduces background noise and intelligently adjusts audio levels to increase clarity on both ends of a conversation.

Plantronics' new Voyager™ 855 offers approximately seven hours talk time, six hours listening time and 160 hours stand-by time from a single battery charge. And at only 15 grams - the Voyager™ 855 is the lightest stereo Bluetooth headset available.

Pricing and Availability:

The new Plantronics Voyager™ 855 stereo Bluetooth® headset costs in the region of £69.00 (including VAT) and is available now at major national electronics retailers.

About Plantronics

In 1969, a Plantronics headset carried the historic first words from the moon: “That’s one small step for man, one giant leap for mankind.” Since then, Plantronics has become the headset of choice for mission-critical applications such as air traffic control, emergency dispatch, and the New York Stock Exchange. Today, this history of Sound Innovation™ is the basis for every product we build for the office, contact centre, personal mobile, entertainment and residential markets. The Plantronics family of brands includes Plantronics, Altec Lansing, Clarity, and Volume Logic. For more information, go to www.plantronics.com.
